**Framework for Understanding Parenting Educator Professional Preparation and Recognition**

This framework is designed to provide information about existing types of professional preparation and recognition available for practitioners in the field of parenting education. Individuals enter parenting education from a broad range of experience and educational levels - from high school education or GED to doctoral degree. This framework is not meant to be a career ladder but can be used as a resource in the development of one. A person can be engaged in more than one of the types of professional preparation and recognition listed simultaneously.

There is currently no widely accepted consensus regarding definitions for the terms “credential” and “certificate” as is evident in the terms used in the examples below. The following are working definitions of these terms as used in this document:

- **Certificate** – completion of a course of study (e.g., 10-day course, 16-credit graduate program; can be credit or non-credit)
- **Credential** – verification or validation of one’s qualifications (experiences and education) as a professional by a third party based on defined criteria

Revised 4.17.2011

Based on current knowledge of NPEN Professional Preparation and Recognition Committee Members. Please contact Karen DeBord at karen.debord@ncsu.edu, Pam Langer at connpat@earthlink.net, Dana McDermott at dmcderm2@depaul.edu, Jerri Wolfe at Jerri.Wolfe@linnbenton.edu, or Betty Cooke at cooke047@umn.edu if you have questions or information to add to the framework.

*Evidence-supported/based curriculum/program – curriculum whose program outcomes have been studied through use of experimental design evaluation research. A program is evidence-supported/based if it is based in theory and has undergone scientific evaluation to provide outcomes and evidence that the program is effective in changing parental practice. When implemented exactly as designed and recommended, an educational program should obtain the same outcomes*
